

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1-39 (Canceled).

40. (New) A light emitting device comprising:

an electroluminescent element using a luminescent material in which electroluminescence is obtained by triplet excitation; and

a semiconductor component electrically connected to the electroluminescent element,
wherein the light emitting device is operated by signals having a voltage selected from two voltages.

41. (New) A device according to claim 40, wherein the semiconductor component is a TFT.

42. (New) An electrical appliance using the light emitting device according to claim 40.

43. (New) A portable telephone using the light emitting device according to claim 40.

44. (New) A digital camera using the light emitting device according to claim 40.

45. (New) An audio equipment using the light emitting device according to claim 40.

46. (New) A wireless portable equipment using the light emitting device according to claim 40.

47. (New) A light emitting device comprising:

wherein Et represents ethyl group; and M represents an element belonging to group 8 to 10 of a periodic table, and

wherein the light emitting device is operated by signals having a voltage selected from two voltages.

48. (New) A device according to claim 47, wherein said M is an element selected from the group consisting of nickel, cobalt and palladium.

49. (New) A device according to claim 47, wherein the semiconductor component is a TFT.

50. (New) An electrical appliance using the light emitting device according to claim 47.

51. (New) A portable telephone using the light emitting device according to claim 47.

52. (New) A digital camera using the light emitting device according to claim 47.

53. (New) An audio equipment using the light emitting device according to claim 47.

54. (New) A wireless portable equipment using the light emitting device according to claim 47.

55. (New) A light emitting device comprising:
a semiconductor component; and
an electroluminescent element electrically connected to the semiconductor component,
wherein the electroluminescent element includes a thin film including a luminescent material
expressed by a following formula:

wherein M represents an element belonging to group 8 to 10 of the periodic table, and
wherein the light emitting device is operated by signals having a voltage selected from two
voltages.

56. (New) A device according to claim 55, wherein said M is an element selected from the
group consisting of nickel, cobalt and palladium.

57. (New) A device according to claim 55, wherein the semiconductor component is a TFT.

58. (New) An electrical appliance using the light emitting device according to claim 55.

59. (New) A portable telephone using the light emitting device according to claim 55.

60. (New) A digital camera using the light emitting device according to claim 55.

Attorney's Docket No.: 07977-276002 / US4942D1

61. (New) An audio equipment using the light emitting device according to claim 55.

62. (New) A wireless portable equipment using the light emitting device according to claim 55 .
